DETAILED ACTION

The Amendment, filed on September 3, 2003 has been entered and overcomes the rejection of claims 101,111,113-118,120 and 121 under 35 U.S.C. § 102(b). The applicants' arguments regarding claim 122 have been considered and are persuasive and hence the rejection has been withdrawn.

Allowable Subject Matter

Claims 1-84,86-105 and 107-122 are allowed over the prior art of record.

The examiner's statement of reason for allowance of claims 1-84,86-100,102-105 and 107-112 has already been cited in the previous office action.

Referring to claims 101, 113, 114, 115, 120 and 121 the references of the Prior Art of record fail to teach or suggest an electron beam apparatus having the combinations of limitations as claimed, particularly the limitation comprising the first member provided with an uneven geometry comprising plurality of depressions which are not covered or closed, with various amplitudes, pitches and arranged in different directions.

Claims 116,117 and 118 are allowable for the reasons given in claims 113,114,115 because of their dependency status from claims 113,114 and 115 respectively.

Regarding claim 122, the references of the Prior Art of record fails to teach or suggest the electron beam apparatus having the combination of the limitations as set forth in claim 122, and specifically comprising the limitation of first member provided

with uneven geometry formed by multiplying one cycle of depression with random and different cycles of depression.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
